Professional Profile

Product Designer specialized in digital product design and user-centered experiences. Experience in UX Research, UI Design, Design Systems, and no-code development, collaborating with startups and companies to transform business needs into intuitive and scalable digital solutions.

I combine user research, product thinking, and AI-driven tools to design experiences that enhance usability, optimize processes, and add value to the business.

Skills

UX/UI Design - Design Thinking - Interaction Design - Prototyping - Design Systems - Information Architecture - User Personas & Journeys - Usability Testing - User Research - Wireframing - Accessibility Responsive Design - User Flows - Illustration

Experience

Comercializadora Las Valentinas

UX/UI Designer & Web
Developer (No-Code)

- I designed and developed a web application to automate the generation of customized quotes, delivering an end-to-end solution in 3 months and reducing the time required to prepare commercial proposals.
- I redesigned the digital experience of the corporate website by defining information architecture, user flows, and interfaces aimed at improving conversion.

Clarity Stethoscope

Graphic Design Intern

- I expanded the corporate design system to enhance the visual consistency of digital and communication materials.
- I participated in creating a presentation for investment acquisition used in front of potential investors.
- I designed visual content for social media that increased user interactions by 35%.

MaterluBooks

Children's Book Illustrator

- I collaborated with the publisher on 6 illustration projects, 4 of which were children's stories and 2 sets of promotional illustrations. The stories consisted of about 25 double pages in color, and I completed each within a 2-month timeframe.
- I contributed ideas and references in the early phases of the projects, maintaining contact with the client at all times.

Herramientas

Figma - Adobe Creative Suite - HTML - CSS - Google AI Tools - Gemini - Office 365
